CORONAVIRUS (COVID-19) Information for Morgan Kalman Clinic Patients

If you are experiencing respiratory symptoms, please call ahead. If you think you have been exposed to COVID-19 and develop a fever and symptoms, such as cough or difficulty breathing, call your primary care healthcare provider for medical advice. It is strongly recommended that you not go directly to your doctor’s office or emergency department without calling first for medical advice, since many can isolate at home without being evaluated in person. More resources are listed below.

The health of our patients, visitors, employees and physicians is always our top priority at The Morgan Kalman Clinic. Due to the continuous spread of the Coronavirus (COVID-19), we want you to know that we are taking additional measures to ensure that our practice and community is safe.

New Visitation Guidelines for all MKC locations:

- Patients with scheduled appointments should contact our office if they are feeling any symptoms (including fever, cough, or shortness of breath) for guidance and self-isolation. These patients should NOT enter either facility without first contacting our office. If you are not feeling well or do not have to visit, please stay home for everyone’s protection.
- If patients are required to enter either of our locations, they will be limited to one visitor or care partner for necessary care coordination or patient assistance. If a care partner isn’t necessary, we encourage that person to wait in their car.
- Our lobby has hand sanitizer for your use and each restroom is stocked with soap for our patients and staff to continuously wash their hands. We know that proper hand washing can prevent the spread of Coronavirus.

WE WILL UPDATE OUR POLICIES AS MORE INFORMATION BECOMES AVAILABLE.

For additional information, please call the Delaware Health and Social Services information line at 1-866-408-1899, TTY at 1-800-232-5460 or email dphcall@delaware.gov.
